## PROJECTS

### Red Rooster
- **Project Brief:** I work with Red Rooster, an Australian fast-food chain established in 1972, focusing on roast chicken, chicken burgers, and fried chicken. My role involves supporting the development of frontend website and creating a React Native application from scratch.
- Technologies Used: React Native, React js, Nextjs, AWS, Lamda function, S3 Bucket and many more.
- Team Size: 10.

### Scott Point
- **Project Brief:** Scott Point is an innovative e-commerce project comprising an admin panel, a React Native mobile application for customers, and a dedicated retailer portal. The project's core mission is to empower customers to make purchases within their preferred price range, while simultaneously offering retailers a platform to showcase and sell their products.
- **Technologies Used:** ReactNative, Reactjs, Nextjs, Prisma, NodeJs, postgres,Graphql.
- **Team Size:** 5.

### Better That | Online Shopping Made Better
- **Project Brief:** Better That is a socially conscious online shopping destination committed to making a positive impact. We donate to a Good Cause of the Shopper's choice with every purchase, at no extra cost. Our products are competitively priced, and we fund every donation ourselves. The frontend of our platform seamlessly integrates products sourced from Shopify and WooCommerce stores.
- **Technologies Used:** ReactJs, NextJs, NodeJs, Express, MongoDB, Git, EJS, Amazon Simple Queue Service, Event Bridge, Lambda.
- **Team Size:** 6.
